VERSION WITH MARKINGS TO SHOW CHANGES MADE

IN THE SPECIFICATION:

Please delete lines 6-7 on page 15.

[Figure 3 is a schematic of a system incorporating both the lock system of Figure 1 and the communication system of Figure 2.]

Please replace lines 9-10 on page 15 with the following:

Figure [4]3 is a diagrammatic illustration of a preferred embodiment of the present invention for protecting data;

Please replace lines 12-13 on page 15 with the following:

Figure [5]4 is a plan view of a diskette illustrating the typical composition of a computer-readable medium;

Please replace lines 15-17 on page 15 with the following:

Figure [6]5 is a plan view of a portion of the diskette of Figure [5]4 but particularly illustrating a method of modifying the magnetization of the diskette by laser according to the present invention;

Please replace lines 19-20 on page 15 with the following:

Figure [7]6 is a plan view of the major portion of an optically-readable medium illustrating the present security in the form of optically-readable data stored thereon;

Please replace lines 22-24 on page 15 with the following:

TO 2090-2342260

Figure [8a]7a is a view of a portion of the optically-readable medium of Figure 6 illustrating the location where a unique identifier may be placed according to the present invention;

Please replace lines 26-27 on page 15 with the following:

Figure [8b]7b is a raised elevational view of a standard configuration of data physically positioned on converted optically-readable media;

Please replace lines 29-30 on page 15 with the following:

Figure [8c]7c is a raised elevated view of a configuration of data physically positioned on optically-readable media according to the present invention;

Please replace lines 32-33 on page 15 with the following:

Figure [9]8 is a view of a portion of the optically-readable medium of Figure [7]6 having a pre-programmed identifying chip operatively associated therewith;

Please replace lines 1-3 on page 16 with the following:

Figure [10]9 is a view of a portion of the optically-readable medium of Figure [7]6 relative to a co-operating media-driven hub according to an alternate embodiment of the preferred invention;

Please replace lines 5-7 on page 16 with the following:
